Welcoming Address by the President of CETOP

The European committee for the fluid power industry, CETOP, is delighted to present to you a European buyer's guide for this industry. Fluid power – hydraulics and pneumatics – is vital wherever there is a need to transmit force and power for drives, controls and motion functions.

CETOP represents associations from all over Europe with over 1,000 member companies. All the leading manufacturers in the fluid power industry are represented in CETOP through their national associations, together with many small and medium-sized enterprises. All these companies appear in the CETOP Directory together with details of their product ranges. The overall spectrum of products is very large. You will find suppliers of both standard products and special solutions, together of course with a comprehensive range of services.

The CETOP Directory offers you an overview of the entire European fluid power industry which is comprehensive but at the same time concise.

For me as the President of CETOP, it is an honour to be able to present this publication to you.

A handwritten signature in black ink, consisting of a series of loops and a long, sweeping stroke that extends to the right.

Arjan Coppens
CETOP President

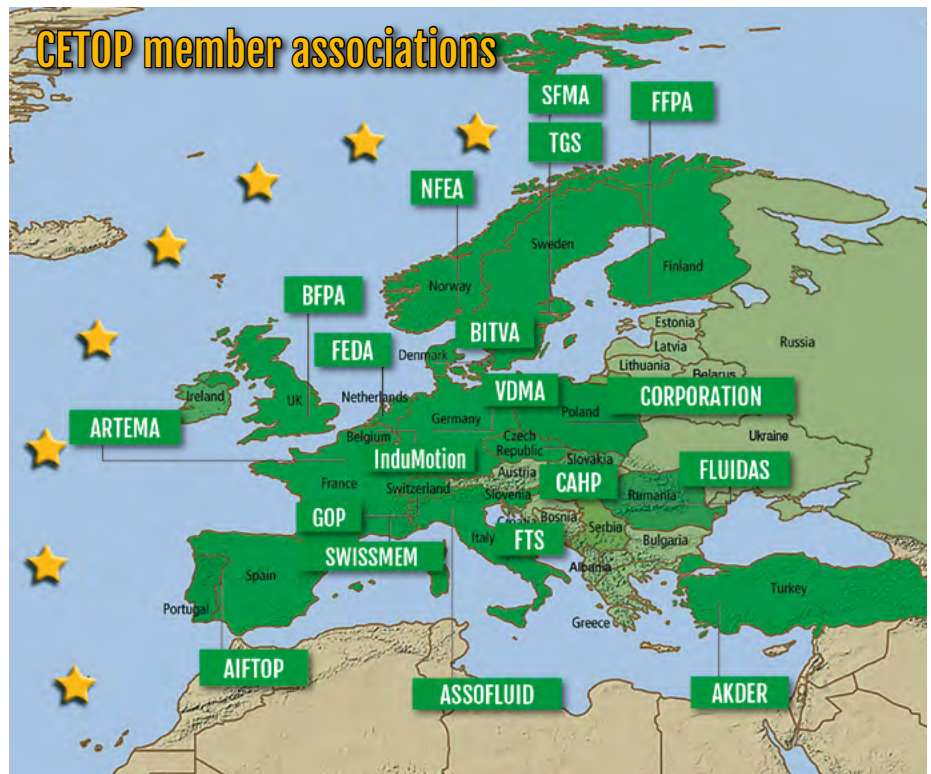

Who is CETOP?

CETOP is the European Fluid Power Committee. CETOP represents this industry in Europe. More than 60 years ago, national fluid power associations anticipated the idea of European unity by founding the European fluid power committee CETOP in Stockholm on 15th June 1962. They thus created the basis for co-operation and communication at European level based on mutual trust and for the benefit of the industry as a whole.

CETOP is an umbrella organisation to which associations from 17 countries belong. CETOP thus represents over 1,000 companies, mainly manufacturers but also dealers, with almost 70,000 people and a market value of 16 billion EURO. This is a very high proportion of the industry as a whole – 80 to 90% for most countries. Through these member associations all renowned companies in Europe belong to the European committee. Many of these companies are leading fluid power manufacturers and major players in the international markets.

The voice of the European fluid power

The purpose of CETOP is to speak for the European fluid power industry. With regard to Northern, Central and Southern Europe, it has been highly successful in its role as an umbrella organisation. Virtually all the relevant European national fluid power associations are members of CETOP. In the countries of the extended European Union and in Eastern Europe, on the other hand, CETOP has some considerable potential still to exploit. Some of these countries, such as the Czech Republic, Poland, Romania and Slovenia, are already represented in CETOP via their national associations while CETOP is in the process of making an initial contact with other countries. These include Bulgaria, Ukraine, Slovakia and Hungary. CETOP also intends to establish progressive contact with other countries. Undoubtedly, there will be certain cases where no fluid power association is in existence, and in these cases CETOP shall enter into discussion with other organisations with a similar character.

CETOP also has good contacts in other regions of the world and works in close co-operation and mutual confidence with the relevant fluid power associations whenever appropriate. These associations are NFPA in America, CFP in Canada, FPSI in India, JFPA in Japan, CHPSA in China, TFPA in Taiwan and SAFPA in South Africa. Joint projects are concerned, for example, with the development of a world-wide statistical system.

A further idea is to open a dialogue with client industries. The European industry committees would be a useful medium for this in the first instance. CETOP envisages joint ventures in, for example, the field of education, since specialist personnel well trained in the field of fluid power are also an important factor for these client industries. Other proposed areas of activity are market observation and statistics.

What is CETOP doing?

In the 60 years of its existence, CETOP has scored successes in many areas. The committee was, for example, the first organisation to concern itself with the development of technical guidelines for fluid power. Many of these CETOP Recommendations formed the basis for subsequent ISO standards. CETOP also became involved in the area of education in such matters as harmonised pan-European requirement profiles for particular qualification levels. It has achieved similarly impressive success in the fields of European and international statistics and market data.

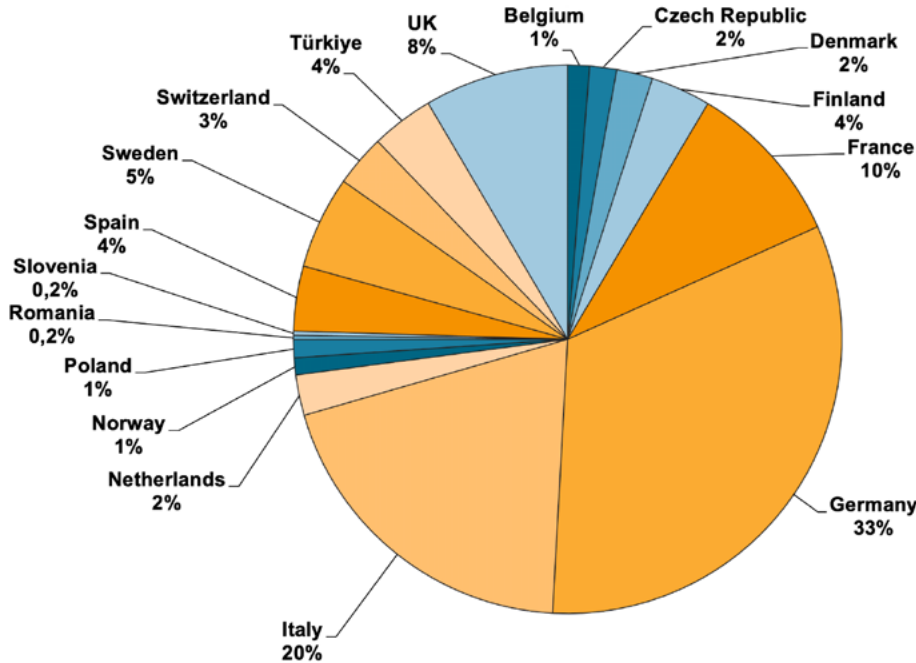

CETOP provides support for its members in many different ways. The committee is working closely together with its member associations and their companies – with the industry, for the industry.

To the members CETOP offers for example:

- CETOP statistics on European fluid power – unique in offering reliable data tailored to the interests of the industry, available exclusively to companies of the CETOP member associations.
- Supplier and product database to advise customers – information on more than 1,000 companies and their products.

CETOP - Statistics

Home Market Fluid Power (Estimated): 16,6 bn EURO

market. This information is not available from any other source, being offered exclusively to CETOP member associations and their member companies.

A CETOP monthly survey allows national trade associations to report a qualitative "snapshot" of business to provide an early indicator of hydraulic and pneumatic market performance by country. Questions covered include: business climate, sales, orders and order backlog - this survey now also has regular respondents from other non-EU countries.

Every quarter-year, CETOP publishes information on current economic developments, based on a trend survey. This includes business data for the current quarter and a forecast for the current year for most of the CETOP countries. This scenario is backed by qualitative statements on trends in client industries and more besides.

Each year, CETOP publishes data on individual product segments. Using standard categories, this data describes the estimated national home markets for hydraulic pumps, hydraulic and pneumatic valves, actuators, etc. CETOP deploys its concept of national home markets to pursue its aim of covering the complete fluid power market in each country and not merely the part of the market covered by member companies. For the purposes for these statistics, it does not matter where a product is produced, whether in the home market or not. What counts is where it is sold.

- Education and training initiative.
 - Position Papers concerning EC Directives – industry’s response to the Commission’s proposals or directives.
 - Lobby at the EU Commission – both in technical and marketing areas, harmonised pan-European proposals are a vital requirement for success.
 - Platform for the exchange of experience and opinions.
 - European network – excellent network of technical and marketing experts.
- And much more.

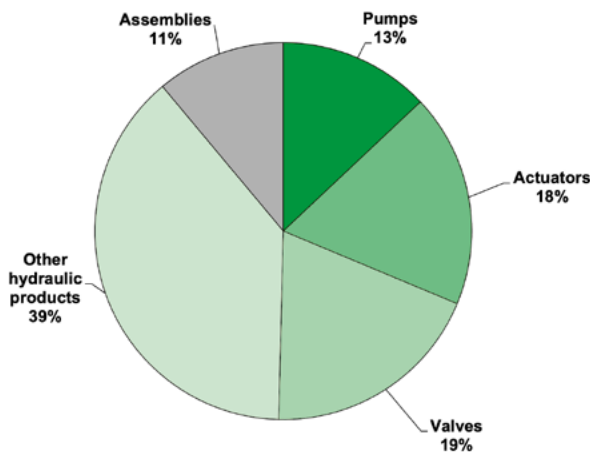

SOME CETOP ACTIVITIES IN MORE DETAIL

CETOP statistics

CETOP provides its members with interesting information on the European fluid power market. The basis for this is three sets of statistics which CETOP compiles with the aid of its member associations. 17 countries participate in this process. The proportion of companies which are CETOP members is very high, around 80 - 90% in most countries, which means that the CETOP statistics deliver very reliable indicators for the European

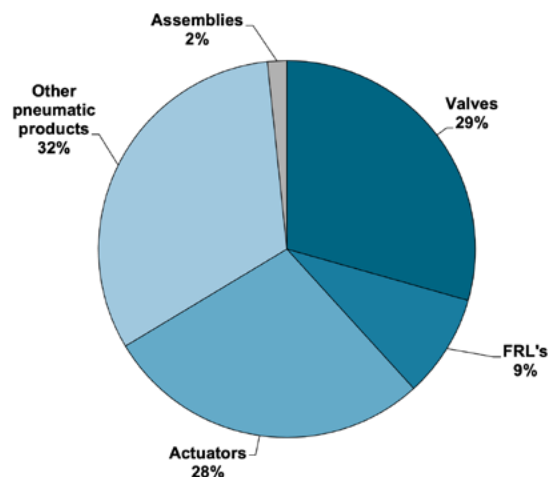

CETOP - Statistics

Hydraulic Products (Estimated Market): 12,2 bn EURO

CETOP - Statistics

Pneumatic Products (Estimated Market): 4,4 bn EURO

ISC statistics

The ISC – International Statistics Committee project, concerned with world-wide fluid power statistics, has been conducted at the suggestion of CETOP members. The objective of this project is to provide comparable information on the relevant fluid power markets for the triad of Europe, the Americas and Asia.

CETOP is not only one of the founding members but has been leading the project for some time. Once again, CETOP is using its concept of national home markets, i.e. what is important is not where a product is produced but where it is sold. Particularly important factors were not only the definition of the product groups for the statistics but also an agreement as to the scope of activities to be covered. In accordance with this, for example, the statistics do not include goods supplied to the aerospace, trucks and defence sectors, among others.

Data for the CETOP area, the USA, Japan, China and Taiwan for fluid power product groups is published annually. Data for a quarterly trend survey and a monthly exchange on tendencies is also collected. This data, too, is not available from any other source and is offered exclusively to CETOP member associations as well as to the ISC partners. CETOP and ISC thus provide their members with an exclusive statistical programme.

Web site www.cetop.org

CETOP also presents itself, its member associations and their affiliated companies on the Internet at www.cetop.org. With this web site, CETOP demonstrates its competence as the representative of the European fluid power industry and offers

the latest news on all aspects of this industry which is highly successful in international competition.

A major element of the web site is the CETOP Directory– the buyers' guide, which provides information on over 1,000 fluid power manufacturers and suppliers – member companies of the CETOP member associations – and their products. An easy-to-use search function using the parameters of companies, products and countries offers a rapid overview of appropriate companies and their complete product ranges. Links can then be used to access these companies' own web sites.

The web site also includes information on technical universities and magazines which are concerned with fluid power, together with listings of international trade fairs and conferences and the addresses of other fluid power associations.

A special area of the web site is devoted to the CETOP Education Initiative. All the Education Recommendations relating to this are available as downloads. For example, requirement profiles are available for various basic and further training levels in the fields of hydraulics, mobile hydraulics, industrial hydraulics and pneumatics. The website also contains a list of CETOP certified Education centres.

Exhibitions and trade fairs

The European committee CETOP is a vital presence at the major fluid power exhibitions and trade fairs around the world. CETOP participates either as a direct exhibitor or a sub-exhibitor in association with a member association. The aim is to

support the marketing of the companies in member associations with the aid of the CETOP Directory.

Representing technical interests

CETOP is also active in the field of the representation of technical interests, for example in the area of European Directives and the effect of these on the fluid power industry. With its Technical Commission, CETOP can draw on an excellent network of technical experts who discuss these subjects whenever necessary from the point of view of the fluid power industry. They produce statements or "Position Papers".

The Single European Market makes it necessary, among other things, to harmonise national regulations, directives and standards, with the aim of eliminating restrictions or barriers to trade. This is achieved through European Directives, which are then enacted as national legislation by each EU member state or regulations, which apply directly.

Fluid power components and systems may fall within the scope of a number of European Directives and regulations, such as the Machinery Directive (Machinery Regulation: Start of application on January 20, 2027), the Directive on Electromagnetic Compatibility, the Pressure Equipment Directive, the ATEX Directive, the WEEE and ROHS Directives, the Eco-design Directive and REACH regulation.

CETOP interprets the Directives and their requirements with regard to their consequences for fluid power components and systems. CETOP Position Papers are published for some of the Directives which affect the fluid power industry.

CETOP Position Papers

CETOP has published Position Papers on the following EU Directives:

- EC Machinery Directive (06/42/EC)
- EC Pressure equipment Directive (2014/68/EU)

The Position Papers are available as download on the CETOP web site:

www.cetop.org.

CETOP Education Strategy

Competence based education and training is at the forefront of the CETOP agenda and with a well established set of “Education Recommendations” the key words for the future are “networking”, “sharing good practices” and “being involved” and that relates to every national association who is member of CETOP.

The “aims and objectives” lay within the plan to develop a network of Centres of Vocational Excellence, approved and qualified to manage, administer and deliver to a common recognised standard, CETOP competence based qualifications. These centres will cover a range of occupational levels relating to the maintenance and management of mobile hydraulic systems and control, industrial hydraulic and control and power pneumatics and control. The fluid power electronics programme complements the series of competence based qualifications.

CETOP Education mission statement

The aim is to provide the forum for National Associations to take up an active role in developing, driving and implementing standards, quality and content of “COMPETENCE BASED EDUCATION AND TRAINING” involving hydraulics, pneumatics and associated controls and thereby provide a recognised qualification structure throughout Europe.

The CETOP Education Recommendations continue to provide an effective and progressive frame work to develop both skills and knowledge of the workforce from apprentice to engineer levels. They provide the skills and knowledge to support those involved in the maintenance and management of fluid power systems and control.

The “key feature” of this qualification structure is the way in which candidates are assessed. CETOP Recommendations cover both knowledge and real world skills linked to:

- Planning
- Installation
- Commissioning
- Maintenance

- Performance testing
- Fault Diagnosis and prevention
- Development of safe working practices, team synergy and improved levels of communication.

This combination of skills and knowledge is assessed against a prescribed list of performance indicators and relates to the level of competence of that person to perform particular range of maintenance related tasks.

Meeting the changes in skills and knowledge

With the continued development of electronics and control, the application of hydraulics and pneumatics has become part of a power and motion control system.

The need to further develop the skills and knowledge of the workforce is fully appreciated by the members of the CETOP Education Commission and it will work closely with industry across Europe and beyond to ensure that CETOP Recommendations continue to address the needs of the 21 century engineers and craftsmen.

Qualifying the work force and providing maximum flexibility – Conscious of the busy lives and work schedules of many people and the time available to study and obtain a CETOP competence based qualification: part of the role of the individual members of the CETOP Education Commission will be

to work through their National Associations and promote the CETOP recognised qualifications working closely with training providers and educational establishments to give customers the most effective route to obtaining this vital qualification.

Quality and high standards are paramount to CETOP – The CETOP Education Commission will continue to place great emphasis upon quality and the guaranteed performance of those obtaining a CETOP competence based qualification. Working to CETOP Recommendations, the Education Commission members will through their National Associations continue to promote the common accord assuring parity across Europe and beyond. To this end the CETOP range of qualifications will be recognised by employers as having great credibility.

All CETOP Education Recommendations are available as download on the CETOP web site:

www.cetop.org

Fluid Power – Efficient, Sustainable and Digitised

Fluid power – hydraulics and pneumatics – transmits force and power for drive, control and motion functions. Unlike electrical power transmission engineering, it uses the physical characteristics of a fluid such as oil, synthetic fluids, water, and air, to transmit force and power. We come across it in all aspects of our daily lives. Hardly any product is developed without the use of fluid power, and barely a machine or aircraft moves without it; we are just not aware of it most of the time.

Fluid Power – Suppliers for the industry

Hydraulics and pneumatics manufacturers are suppliers for the entire manufacturing industry. They are technological pioneers for innovative solutions in

- mobile machinery
- machine tools
- food processing and packaging machinery
- environmental technology
- semiconductor manufacturing
- automotive engineering
- medical technology
- and many others

Energy and resource efficiency, sustainability, climate protection, etc., are essential topics for a good and healthy future for all of us.

Fluid power companies contribute to this with innovative developments involving the latest materials and state-of-the-art electronics as well as digital solutions.

Pro Hydraulics

- High power density
- Robustness and overload protection with simple load limitation
- Good time response due to low inertia
- Small installation space and flexible assembly
- Long life-time
- Low life-cycle-costs (cost advantage with many axes due to shared hydraulic power supply unit, very cost-effective in load holding operation)
- Peak load coverage via storage technology
- Good lubrication and corrosion protection by means of an operating medium (integrated cooling)

- High starting torques with hydrostatic transmissions

Pro Pneumatics

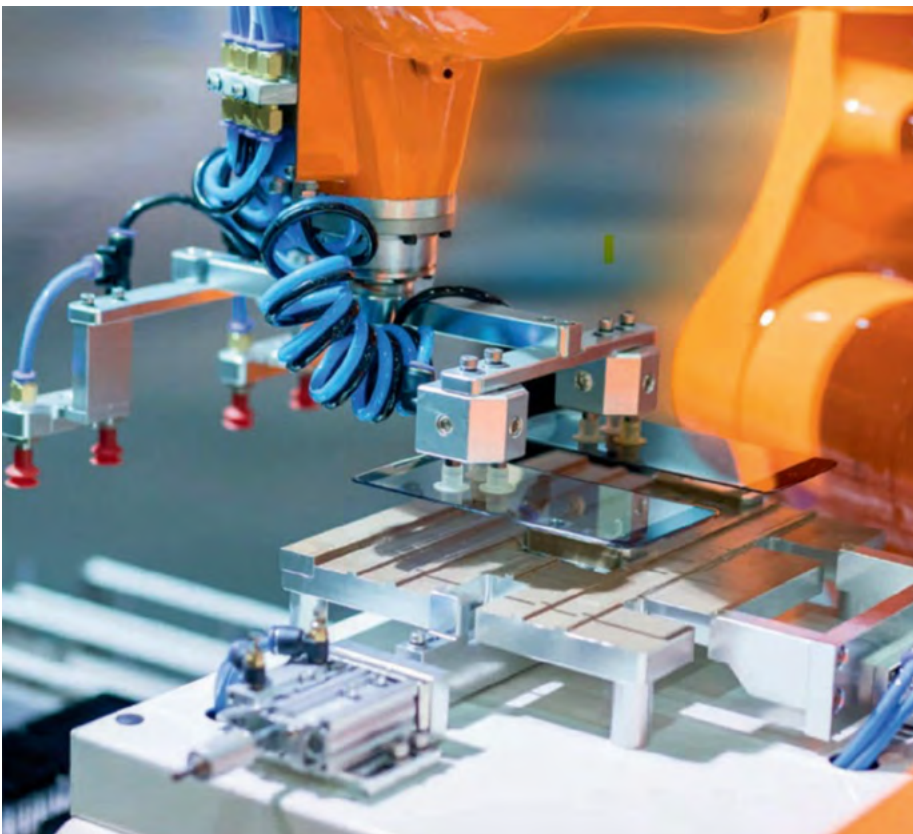

- Robustness and overload capacity
- Simple design and lightweight construction by use of aluminum and plastics
- Low investment costs
- High specific power density
- Constant peak load
- Resilience in case where maximum power rating is exceeded (service robots)
- Low energy consumption in long cycles
- Small installation space
- Application in hazardous areas

Fluid power – Communication in a Digital Network

Digitalized value chains require products and components that can communicate with each other reliably in all kinds of applications. This universal digital communication is a key task to successfully implementing Industrie 4.0.

Fluid power is capable of communicating in a digital network and of generating, processing and sharing data. With intelligent data analysis, it is possible to better monitor and steer processes and to control and guarantee product quality. In this way, economic and ecological advantages arise which can be attributed to increased energy efficiency as well as the optimal and flexible utilization of machines and plants.

Fluid power products are known for their high reliability and great power density. With the help of innovative digital solutions, operating costs can be reduced and precision increased. In addition, digitized, connected and intelligently controlled fluid power products make it possible for new products and services to be developed in user industries.

AIFTOP

ESEIAAT-Edifici TR4 (Labson) · c/ Colón nº 7-11 · UPC-Campus de Terrassa
08222 Terrassa (Barcelona) · SPAIN
Phone: +34 937 398224 · E-mail: centre.labson@upc.edu · Web: www.aiftop.es

The Iberian Association of Manufacturers and Traders of Hydraulic and Pneumatic Transmissions (AIFTOP) was founded on November 11, 1966, under its original name AEFTOP (Spanish Group of Manufacturers of Hydraulic and Pneumatic Transmissions).

Our goal is to progress toward an association where various energy transmission systems (mechanical, electrical, and fluid-based) converge. We also aim to incorporate related technologies, extending automation to many other fields such as process control, electro-mechanical systems, robotics, and more. In these areas, mechatronics, microelectronics, sensor technology, IoT, and connectivity drive innovation and deliver future value.

AIFTOP is a forum where manufacturers, distributors and educators work together to develop and promote industrial automation driven by fluid power technologies.

AIFTOP service:

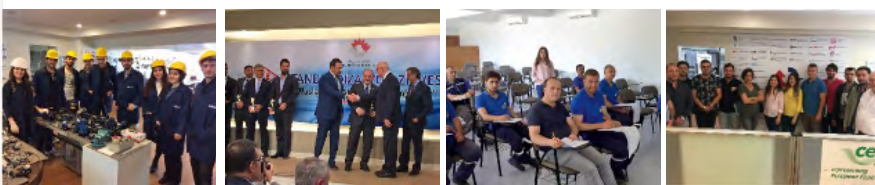

- Access to highly accurate information about our market through the annual report and trend studies (monthly and quarterly).
- Access to European and global market information through CETOP (Comité Européen des Transmissions Oléohydrauliques et Pneumatiques).
- Networking among the leading companies in the sector to share experiences.
- Advertising presence in media and on social networks through the association's various channels.
- Access to training, courses, talks, and business meetings.

AKDER
TURKISH FLUID
POWER ASSOCIATION

AKDER

Yakacık Çarşı Mah. Kartal Cad., No:92 İç Kapı No:9
34876 Kartal İstanbul · TURKEY
Phone: +90 505 050 34 23
E-Mail: akder@akder.org · Web: www.akder.org

AKDER is established in 1994. As of today, has 75 members. AKDER consists of members who manufacture Hydraulic and Pneumatic products in Turkey, distribute on over certain commercial levels and perform projects.

Mainly, AKDER represents all members in Turkey and around the world, exercise in order all members to comply with the rules of business ethics. In the line with CETOP's recommendations, has provided a training center called UAGEM in Istanbul in order to give Hydraulic and Pneumatic education and training.

Cooperates very closely with Turkish Standard Institute, involved in the evaluation of international standards by establishing Mirror Committee.

Informs members on the sectoral issues through its website which is set up in Turkish and English.

AKDER service:

- Education and Training • Statistics • Technical Standards • Exhibitions
- Cooperation with Turkish Machine Manufacturers and Exporters Union
- Members Directory on internet and published copy

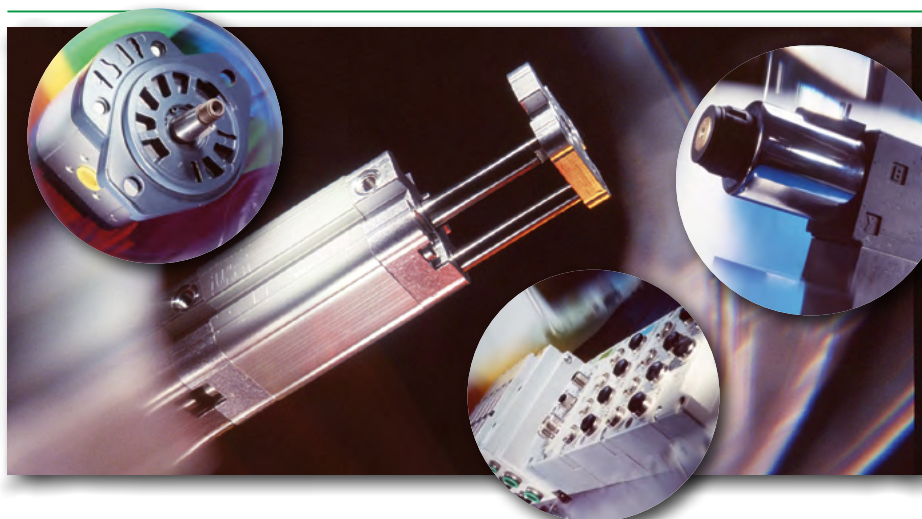

ARTEMA

39 rue Louis Blanc · CS 30080 · 92038 LA DEFENSE CEDEX · FRANCE

Phone: +33 1 47 17 63 91

E-Mail: info@artema-france.org · Web: www.artema-france.org

ARTEMA is the French Mechatronics Industries Association. It brings together more than 150 member companies: suppliers of components, solutions and systems in the fields of: bearing and linear motion, chains and transmission elements, fasteners, gears and gearboxes, hydraulics (mobile and industrial), maintenance and services, mechatronics, pneumatics and automation, sealing technologies.

ARTEMA's members started to use very early mechatronics. They integrate very complex mechanics, electronics and informatics technologies in their systems which increase a lot performances, productivity, and environmental impact of the products.

ARTEMA is member of the French Mechanical Engineering Federation and in Europe of CETOP, EIFI, EUROTRANS and FEBMA.

ARTEMA service:

- Representing and promoting the profession
- Offering a mutual structure for the reception and exchange of information
- Participating in technical, economic and legal developments concerning our professions
- Ensuring the future and the competitiveness of careers through the development of mechatronics

ASSOFLUID

Viale Fulvio Testi, 128 · 0092 Cinisello Balsamo (MI) · ITALY

Phone: +39 02 29010411

E-Mail: federtec@federtec.it · Web: federtec.it

ASSOFLUID is the Italian Association of Manufacturing and Trading Companies in Fluid Power Equipment and Components.

Since 1968, the year of its foundation, ASSOFLUID is the most important Italian reference for all the operators of the Fluid Power sector, with 190 member companies.

The Fluid Power industry in Italy employs more than 27,000 people, with a sector turnover exceeding 4,7 billion euro and a national market value of 2,8 billion euro.

The Association's primary objectives are to coordinate, represent and develop the technical and economic interests of hydraulic and pneumatic industries. The Directory is a primary tool to know the existing offer of fluid power components and systems in Italy.

Since June 2019, ASSOFLUID has joined FEDERTEC, the Association representing the Italian Industry of Mechatronic Technologies and Components for Fluid Power, Power Transmission, Smart Automation and Control of Industrial Products and Processes.

ASSOFLUID service:

- Statistics / Market data
- Promotional activities
- Exhibitions
- Education programme
- Technical & Economic meetings
- EC Directives & Standardization monitoring
- Information platform

BFPA

Cheriton House · Cromwell Park · Chipping Norton · Oxfordshire · OX7 5SR
UNITED KINGDOM

Phone: +44 1608 647900

E-Mail: enquiries@bfpa.co.uk · Web: www.bfpa.co.uk

BFPA service:

- Education & Training – Certifying body for Hydraulics & Pneumatics engineers
- Statistics / Market – National & International data
- Exhibitions – UK & International • International Standards Development work
- Members' Directory – Internet & Published Copy • Information Web Site
- Publications • Networking

BFPA, The British Fluid Power Association represents the interests of over 240 companies in the Hydraulic and Pneumatic sector. In the years since its formulation in 1959, the BFPA has grown from a small group of mutually-supportive companies to a major Trade Association undertaking business on a truly international scale.

The Association provides full support services for its members with an emphasis on Education and Training, International Standards Development work, Market Statistics and support at both UK and International Exhibitions. The BFPA plays an influential role within the world of fluid power standards owing to its position as an external secretariat on behalf of the BSI, the UK's National Standards Body (NSB).

BITVA

Børsen · 1217 Copenhagen K · Denmark

Phone: +45 3374 6112 · Fax: +45 3374 6080

E-Mail info@bitva.dk · Web: www.bitva.dk

BITVA service:

- Providing technical support to its members
- Organising seminars of domestic and foreign experts
- Representing and promoting the profession
- Organising international conferences

BITVA is a commercially oriented nationwide industry association with more than 150 member companies. The industry's companies are suppliers of all types of automation and automation solutions, transmission systems, tools and machine tools, accessories, equipment, spare parts, etc.

BITVA's mission is to ensure continued development in the industry through the industry's interests towards authorities and promote professional advice to the industry's customers at

- conveying knowledge about - and insight into industry development
- promoting the social and professional network in the industry
- taking care of the industry's interests
- promoting access to skilled labor to the industry
- to convey the knowledge about all matters that are of general interest to the industry

CAHP

CAHP

Novotného lávka 200/5 · 116 68 Praha 1 · CZECH REPUBLIC
Phone: +420 221 082 203 · E-Mail: strojspol@csvts.cz
Web: www.cahp.cz

CAHP is the Czech Association for Hydraulics and Pneumatics, representing 21 member companies and in existence since 1997. In this same year, CAHP became a member of the international organization CETOP. The Association's general objective is to provide an opportunity to exchange high quality, recent information on developments, design and research in the field of hydraulics and pneumatics.

CAHP service:

- Providing technical support to its members
- Organising seminars of domestic and foreign experts
- Representing and promoting the profession
- Organising international conferences

Corporation of Hydraulic and Pneumatic Drives and Controls

Wrocław University of Science and Technology, Department of Operation and Maintenance of Logistics, Transportation and Hydraulic Systems
ul. Łukasiewicza 7/9, room 308 · 50-371 Wrocław · POLAND
Phone: +48 71 3202667 · E-mail: krzysztof.kedzia@pwr.edu.pl
Web: cpl.pwr.edu.pl

The Polish Corporation of Hydraulic and Pneumatic Drives and Controls was founded in 1994 as an organization of economic authority, independent of the Polish Government. The Corporation unites 20 manufacturing and trade companies, scientific institutions and associations in the hydraulic and pneumatic sectors. The Corporation is a member of the Polish Chamber of Commerce for Machine Components and Technology.

The main objectives and tasks of the Corporation are the development of the domestic sector of fluid power industry throughout the country as well as representation and protection the interests of member companies.

Corporation service:

- Participation in fairs and exhibitions especially in Katowice and Kielce through: co-organizing of exhibition, organizing of seminars and meetings and also as a member of competition jury for the best fair product.
- Since 1995 co-organization one of the oldest and greatest conferences on fluid power in Poland.
- Education programmes. · Collecting and analyzing of statistical data from domestic market.

FEDA

Reitseplein 1 · 5037 AA Tilburg · THE NETHERLANDS
Phone: +31 13 5944158 · E-Mail: info@feda.nl
Web: www.feda.nl

As a federation FEDA is the result of the integration of the former associations FHP, VVA and GTA. FEDA has more than 165 member companies, with a focus on fluid power, pneumatics, electric & mechanic motion control and industrial automation.

Legal support, information exchange, promotional events and exhibitions are the most important activities of FEDA. For the growing market for innovative automation and motion solutions FEDA helps its members in being competitive.

FEDA service:

- Statistics/market data for member companies
- Exhibitions (every 2 years in Utrecht) • Workshops • Education programmes
- Public Relations
- Informing member companies about relevant technical, legal and economic developments • Member benefits programme

TFinnish Fluid Power Association (FFPA)

Haravatie 7 · 68300 Kälviä · FINLAND
Phone: +358401252192 · Email: info@ffpa.fi · Web: www.ffpa.fi

The Finnish Hydraulics and Pneumatics Association, FHPA

Finnish companies, which operate in the Fluid Power business, are members of FHPA, the Finnish Hydraulics and Pneumatics Association, which was founded in 1977. The association currently has 58 member companies, and their combined turnover covers 95 % of the Fluid Power market.

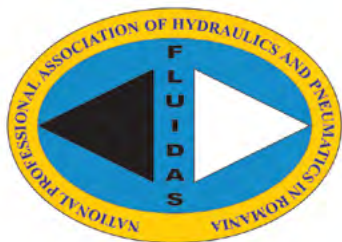

Vision: Target of Association is to maintain successful and progressive field of high technology, which is operating as innovation leader for Finnish industry and is preferred as employer.

Mission: Task of Association is to contribute development in field of hydraulics and pneumatics in Finland and take care of pre-conditions for success in global activities.

FHPA service:

Association maintains useful and supporting activities for its members by focusing following main areas in field:

- Improving the general visibility and image
- Creation of actual market information by market and trend analysis
- Launch field by exhibitions and other activities
- Trading activities and communication with education institutions

FLUIDAS

14, Cutitul de Argint Street · 040558 Bucharest
ROMANIA
Phone: +40 21 336 3991 · Fax: +40 21 337 3040
E-Mail: fluidas@fluidas.ro · Web: www.fluidas.ro

The Association's principle objectives are the development of the fluid and pneumatic power systems field and connected activity fields (lubrication systems, electronics and automation in hydraulics and pneumatics) by means of creating, promoting and developing research development and innovation programs and themes, at a national level; the creation, promotion and development of research development programs and themes, in the framework of international projects; organizing specialization courses in the field of fluid and pneumatic power systems and connected activity fields in order to raise the qualification of the manpower from the associated companies; the management of the activity regarding technical and scientific informing by establishing and facilitating the access to the association database.

Collaboration with counterpart organizations from abroad and with specialized coordinating bodies, within the Council of Europe and worldwide.

Fluidas is a co-publisher of the technical magazine "HIDRAULICA".

Fluidas is a co-organizer of the International Conference of Hydraulics and Pneumatics – HERVEX.

FLUIDAS service:

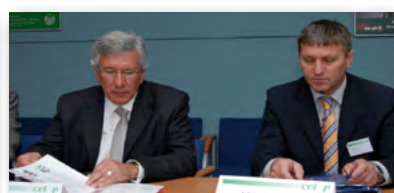

- Scientific manifestations, symposiums, workshops, exhibitions, presentations of companies, as well as providing access to the database of the association
- Technical expertise in the field
- Organizing trainings in the field of hydraulic and pneumatic drive and connected fields to improve manpower quality

FTS

Dimičeva 13 · 1000 Ljubljana · SLOVENIA
Phone: +386 1 5898 308 · Fax: +386 1 5898 200
E-Mail: zeljko.jokic@gzs.si · Web: www.gzs.si

Fluidna Tehnika Slovenije is the Slovenian association of manufacturers, distributors, users and educators in the field of fluid power technology. Actively participating in the field of fluid power branch on issues as laws and directives, terminology, standardization, training, exchange of information etc., the association encourages closer cooperation between industry and expert institutes and universities, monitors new technological trends and provides its members with information.

FTS service:

- Mutual exchange of business and market information
- Information about European Directives and technical standards
- Education programmes
- Exhibitions

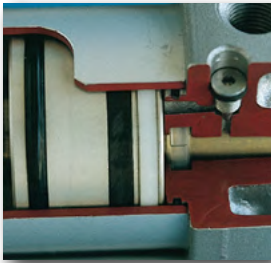

GOP

GOP Gesellschaft für Fluidtechnik

Tödistrasse 42 · 8027 Zurich · SWITZERLAND

Phone: +41 43 305 0982

E-Mail: info@gop-verband.ch · Web: www.gop-verband.ch

GOP, the Swiss Fluid Power Association, was founded in 1971 and consists of about 75 member companies in the fields of trading and production. The aim of the Association is to promote the common interests of all member companies in the fluid power market. The members of GOP endeavour to support the technical education recommendations and economic development of the fluid power industry.

GOP service:

- Information service
- Exhibition: cooperation contracts with various exhibition organizers
- Technology
- Statistics/market data
- Internet platform

INDU MOTION

INDUMOTION vzw/asbl

Provinciesteenweg 9 · 3150 Haacht · BELGIUM

Phone: +32 471 20 96 73 · E-Mail: info@indumotion.be

Web: www.indumotion.be

InduMotion is the association of manufacturers, importers and distributors of material and services in industrial automation. The members of our association are active in Hydraulic, Pneumatic, Electromechanical and Electronic transmissions, as well in power as in motion.

The mission of InduMotion is to distribute, develop and explore the technical and economic know-how of its members and to promote industrial automation. InduMotion publishes the largest technical trade journal in Belgium, AUTOMATION MAGAZINE, and is organizing-partner of INDUMOTION, the industrial automation exhibition in Belgium. InduMotion currently counts 80 members and covers the majority of the Belgian Industrial Automation Market.

INDUMOTION service:

- Magazine
- Product Guide
- Statistics and Market data
- Exhibitions
- Marketing Support
- Education programmes

NFEA

Andøyfaret 33 · 4623 Kristiansand · NORWAY

Phone: +47 90 90 92 94

E-Mail: nfea@nfea.no · Web: www.nfea.no

The Norwegian Association of Electric and Automatic Control (NFEA) is a politically independent, non-profit organization dedicated to advancing the fields of electrical engineering and automation. Established on January 1, 2018, through the merger of the Norwegian Association for Automation (NFA) and the Industrial Association for Electrical Engineering and Automation (Ifea), NFEA comprises approximately 270 member companies and 15 educational and research institutions. The association focuses on networking, competence development, and enhancing the competitiveness of Norwegian industry. The organization operates five regional branches across Norway and collaborates with both national and international partners to offer a diverse range of activities, including courses, seminars, and conferences.

HPF service:

- Networking, competence development, and enhancing the competitiveness of Norwegian industry

NFEA's mission is encapsulated in its slogan: "Passionately concerned about the competence of the future – through learning, sharing, and networking."

SFMA Swedish Fluid Motion Association

P.O. Box 22 307 · 104 22 Stockholm · SWEDEN

Phone: +46 8 121 62092

E-Mail: sfma@branschkansliet.se · Web: www.sfma.se

SFMA – the Swedish Fluid Motion Association is the new association that was established in 2019 through the merging of HPF (Swedish Association for Hydraulics and Pneumatics) – established 1962, and IFS (Fluid System Engineering Association) – established 1972, and currently comprises some 55 members. With joint forces the aim of the new association is to become stronger in promoting the industry and quality, safety and reliability when using hydraulics and pneumatics. SFMA actively supports standardisation in Sweden and works for increased information and education of users and suppliers in this field. SFMA is also the certifying body for hydraulics engineers in Sweden – a quality and professional benchmark for the automation industry.

SFMA service:

- Statistics/market data • Exhibition co-organiser • Information website
- Standardisation • Certifying body for hydraulics engineers • EC and local directives monitoring

SWISSMEM

Pfingstweidstrasse 102 · P.O. Box · 8037 Zurich · SWITZERLAND

Phone: +41 44 384 41 11

E-Mail: info@swissmem.ch · Web: www.swissmem.ch

Swissmem unites around 1100 companies active in the mechanical and electrical engineering industries (MEM) and represents the business, social and training policy interests of its member companies. The MEM industries play a key role in the Swiss economy. They are by far the largest industrial employer.

The division Swiss Fluid Power Industry regards itself as the interest group for Switzerland's manufacturers in the hydraulic and pneumatic industry. The companies active in this sector are in a position to offer total solutions on a customer-specific basis – one of the Swiss suppliers' numerous strengths.

SWISSMEM service:

- Consulting on export topics • Advice on contract, competition and intellectual property law • Assistance with labour law issues
- Sector-specific educational and training programmes • Tailor-made activities for the individual divisions (27) • Public relations • Networking

VDMA

Fachverband Fluidtechnik · Lyoner Strasse 18 · 60528 Frankfurt am Main
GERMANY

Phone: +49 69 6603 1332 · Fax: +49 69 6603 2332

E-Mail: fluid@vdma.org · Web: www.vdma.org/fluidtechnik

The Fluid Power Association within the VDMA represents the interests of over 200 member companies from the fields of hydraulics, pneumatics and sealing technology, comprising over 85% of the market.

The Association informs its members concisely on all matters relating to fluid power and mechanical engineering. Thanks to its link to the VDMA (Mechanical Engineering Industry Association), with more than 3200 members, the Association has access to information and contacts for all its major markets.

The Fluid Power Association organises and participates in working groups and committees, liaising closely with experts from its member companies – with the industry, and for the industry.

VDMA service:

- Platform for the exchange of experience • National/international market data for fluid power and client industry • National and international standardization • EU Directives: Lobbying and interpretation for the fluid power industry • Joint research projects • Branch offices: Brazil, China, India, Japan, Russia • Public relations work • Joint stands at exhibitions in Germany and abroad
- Manufacturers' directory on the Internet and as printed version
